Wedding Bells

Connell-Brace

A pretty wedding was solemnized Sunday, June 30th, at the home of the bride's parents Mr. and Mrs. Geo. Connell, when their eldest daughter Lillian Jean became the bride of Mr. Claud Grover Brace son of Mr. and Mrs. L. Price, of Montere, with Rev. Mr. Sneddon, of Youngstown, officiating.

The bride entered the room on the arm of her father to the strains of "The Bridal Chorus" played by Mr. Howard. She looked charming in a gown of white net with white accessories and carried an arm bouquet of roses.

The bridesmaid, Miss Marion Connell, was gowned in a dress of monet blue with hat to match, and also carried an arm bouquet of roses.

The groom was supported by Mr Donald Connell, brother of the bride.

The bridal couple stood beneath an arch of ferns and roses.

During the signing of the register Mrs. Sneddon sang "Oh Perfect Love". After the ceremony a wedding supper was served, with only intimate friends and relatives present.

Mr and Mrs. Brace left by car for a short honeymoon in Calgary.

Mr. A. V. Youell left Sat for Saskatoon where he joined Mrs. Youell en route for Harris where they visited with friends Mr. Youell returned Tuesday.

Mrs. Stewart is visiting for a week at the home of her son R. Stewart.

Mrs. Lockwood, Mrs. G. Whelan, sister-in law of R. Whelan, son and daughter, Sydney and Jean, all of Detroit arrived by motor last week to visit for a time at the home of Mr. and Mrs. R. Whelan.

Lorne Proudfoot M. L. A left for Edmonton Saturday, where he will attend Session.

Mrs. Ed. Stewart, of Naco, who has been visiting for the past month with relatives at Ottawa, Ont. returned Sat.

Mrs. Ralph Whelan went to the Cereal hospital Wednesday, where she expects to have to submit to an operation.

The Friendly Circle held two meetings in June; June 6th at the home of Mrs. J. C. Bayley and June 27th at the home of Mrs. R. Stewart. The Circle wishes to thank all those who in any way assisted in making the "Hope Chest" a success. Donations from the funds were made as follows: \$10.00 to the School Fair and \$5.00 to the Chinook Social Credit Study Group.

Arrangements are being made to hold a picnic during July.

The July meeting will be held at the home of Mrs. Wm. Davis

Mr. S. Meeres, school principal and family, left Friday for Sylvan Lake, where Mrs. Meeres and Murray spend the holiday's with her parents, while Mr. Meeres attends summer school at Edmonton.

Mr. Elford who taught in the Chinook high school for the past four years, has accepted a position at Taber.

Miss Kain, primary teacher, left Saturday for her home at Leduc.

Miss Jensen left Saturday for her home at Stettler.

Miss Elliott, Rearville teacher left for her home at Calgary on Tuesday.

Miss Joan Bayley and little Maxine Pfeiffer spent the holiday with Joan's parents.

Miss H. McManus and her parents spent the week end at the home of Mr. and Mrs. H. Stewart.

Mrs. McKenzie and Miss Mary Elder are spending a week at Veteran, where they will attend Camp meetings.

Miss Agnes Bonnay who has been attending high school at Chinook during the past term, returned to her home Saturday.

Jas Duck who spent a six week's vacation with his father near Red Deer, returned Sat.

Robert J. Harrington who has been attending Agricultural College at Olds, returned Friday. Robert's standing in his class at Christmas Exams was first and at closing fourth

HOW TO MAKE ICED TEA

Infuse six heaping teaspoons of Salada Black Tea in a pint of fresh boiling water. After six minutes strain liquid into two-quart container. While hot, add 1½ cups of cold distilled spring water. Stir until sugar is dissolved; fill container with cold water. Do not allow tea to cool before adding the cold water; otherwise liquid will become cloudy. Serve with chipped ice.

"SALADA" ICED TEA

Protect Wild Life

This is an age of organization. Men and women, boys and girls, band themselves together in clubs, associations, unions, large or small, some single isolated groups, others as branches of a Provincial, Dominion, or international body. There are clubs to promote almost every conceivable thing, or object, in which mankind can possibly be interested. Their number is legion, and new organizations spring into existence almost every week.

Many organizations have been in existence for a long time, have large memberships, and very definite objects to serve. They have long occupied a useful and honorable place in our democracy, command the respect of all, and have made worthwhile contributions to society as a whole. Members of such bodies are banded together, as a rule, in support of some great principle to which they are intensely devoted.

There are other organizations which come into being under the stress of temporarily prevailing conditions, and when those conditions change and pass away, these organizations pass out of existence, some having exerted a beneficial influence in the direction of reform and progress; others leaving little but a trail of disillusionment and loss behind them.

It would be impossible to even list, let alone classify, the organizations now in existence making appeal for the support of the public, and it is not the intention of this article to make any such attempt. Rather at this time it is proposed to direct attention to one particular organization, to which no great publicity has been given in past years, but which has been engaged in quietly, but none the less effectively, promoting a cause in which the people of Canada ought to take a very keen and active interest. On former occasions the attention of readers of this column has been drawn to other worthwhile organizations, consequently in now singling out one specific organization for a word of commendation we are making no new departure.

The organization now referred to—possibly we should refer to it in the plural and say organizations—are the Fish and Game clubs or leagues of the various provinces. These organizations are province-wide, not confined to sportsmen alone, but wide open to the naturalist and all lovers of wild life, whether they hunt with a gun or a camera or the notebook of the scientist, for, in the final analysis, the interests of these are common to all.

The objects of these organizations are to promote wild life research; by an educational campaign to instill into the minds of people the cardinal rules and laws of nature and the necessity of giving to nature the assistance of the human element, where necessary, in order that the happiness which comes from plenty can continue to exist; to secure the passage of the necessary laws to prevent extinction of declining species and to ensure the rigid observance of those laws; to endeavor to maintain the necessary surface water supply, natural cover, trees and food conducive to a bountiful supply of useful wild life, and to control or eliminate those of its enemies which threaten its continued existence.

From this abbreviated outline of objects it will be seen that, in promoting them, these organizations are likewise promoting the welfare of all, irrespective of whether they are directly interested in the preservation of wild bird and animal life or not. For example, agriculturists and livestock men, in recent years, have seen the wisdom and necessity of conserving surface water supplies brought close home to them. Equally so, is the wisdom and necessity of protecting trees from wholesale destruction in order that one of the main sources of surface water supplies should not likewise be destroyed.

As a people we have devoted far too little thought and study to the many forces and factors nicely balanced by nature to make this world a habitable, productive and beautiful land, and we have proceeded in our ignorance to do many things which have worked to our own injury with dire results and at a tremendous cost and enormous loss to ourselves and our country. We must work with nature with knowledge and understanding, not in direct opposition to nature, if we are to survive and prosper.

Apart, therefore from the attractiveness which an abundance and great variety of wild animal, bird and fish life gives to any country, the natural conditions which make such wild life possible are likewise the conditions which give beauty to a country and provide what may be regarded as the basic foundation upon which the productivity of the land rests; for without water and natural shelter the land would become a desert.

For these reasons, among others, Canadians should support organizations like the Fish and Game Clubs, if not by enrolment as active members therein, at least by extending their sympathy, support, and co-operation in achieving the objects for which such organizations exist. In a word, every Canadian should be a protector of Canada's wild life, and alert and ready to assist in maintaining those natural conditions which alone make wild life possible.

Must Import Grain**Manchuria Will Require Extra Supplies To Feed Population**

For the first time in many years, Manchuria will, this year, have to import grain in order to keep its own 30,000,000 people fed.

Because of lack of rain, it is feared that this year's crops of millet and other grains will be a failure, except in favored districts, and already the government of Manchukuo has made arrangements to import 50,000 tons of rice from Saigon, Rangoon and Bangkok. Additional large purchases are contemplated.

The people of Manchuria are not rice eaters, like the Chinese farther south. They subsist normally upon mostly millet and kaoliang, a species of maize.

Shorter Men For Army**British Regulations Fix Minimum Height For Infantry At Five Feet, Two Inches**

The British army is to be shorter. Recruiting regulations issued recently fix the minimum height for infantry at five feet two inches. This is two inches below the old minimum.

Cavalry of the line, tank corps, Royal Engineers, army ordnance corps may all accept recruits one inch below the minimum previously stipulated, provided they are otherwise fit.

The war office is determined, in view of the dearth of recruits, to bring the army up to full establishment.

The larger a bird happens to be, the longer its life span.

A WORLD OF FLAVOR**Latest Method Detects Fingerprints On Cloth****Will Preserve Them Indefinitely After They Are Found**

A new technique capable of developing fingerprints left on cloth—much as a snapshot negative is developed—has been added to the New York police department's bag of tricks.

The method, an indirect product of the Hauptmann case, includes the important accomplishment of preserving the original prints after they are found. Chemical baths bring out and fix the prints.

Shortly after the Lindbergh baby was kidnapped, Dr. Erastus M. Hudson, a specialist in body chemistry who makes fingerprints a hobby, was called to Hopewell, N.J., to examine the ladder used in the crime.

Using an iodine gas process, he found 500 prints where police had found none with the old powder-dusting method. Incidentally, none of the prints was identified.

Dr. Hudson was invited to direct the New York police department's crime-fighting research in this field.

The successful use of silver nitrate solutions on bleached linen and other cloths of light shade, and calcium sulphide on darker fabrics, followed.

The treatment brings chemical transformation of body salts in the wax of which fingerprints are made, causing the tiny lines to become apparent to the eye. The prints may be several years old.

The new technic is superior to the currently widespread method of dusting suspected surfaces with colored powder, it was said, because the powder-dusting is effective only when the wax is fresh.

Strange Inventions**Weird Array Of Gadgets At Chicago Congress**

Termed by their own president as "guts," the gadgeteers of the 14th annual national inventors congress brought to Chicago a strange array of thingamajigs, hotnannies and doodads.

Among things which attracted spectators who viewed the exhibits of 700 inventors and 3,500 manufacturers and distributors were "lullaby bassinet," a pneumatic ladder, and a hen's nest which separates layers from hens.

If biddy lays an egg she automatically releases a latch which allows her to stroll out into the yard where the layers frolic. No eggs? The only door open to biddy is the one which permits her to enter another yard which big, had been come to gather chickens for market.

"Many inventors are nuts, as I am," said Albert G. Burns, of Salt Lake City, president of the congress. "But don't forget it's the nuts who generate ideas which develop into inventions."

In the home life sector also was the "lullaby bassinet" which, at the turn of an electric switch provides remote control rocking for babies.

Grading Garnet Wheat**To Indemnify Grain Elevators For Loss Sustained**

An appropriation of \$1,500,000 appeared in supplementary estimates tabled in the House of Commons, to indemnify grain elevators which may suffer loss through the separate grading of Garnet wheat. The change in grading is to come into force on August 1, 1935, and the regulation was effected in an amendment to the Canada Grain Act passed last year.

Supplementary estimates amounting to \$16,362,978 were introduced by Finance Minister E. N. Rhodes. Outside of additional appropriations for public works, the department securing the largest vote is national defence, for which more than \$3,000,000 is asked.

Battles With Reptile**Noted Traveller Secures Fine Specimen Of King Cobra**

Lawrence T. Griswold, noted anthropologist who has headed a number of expeditions for the Smithsonian Institute and National Zoological Park of Washington, D.C., arrived at Victoria recently with a fine specimen of the king cobra, which, he said, nearly took his life.

One night in the Philippine Islands Griswold awakened suddenly to find the giant cobra ready to strike. He diverted its attention by throwing a blanket and then with other members of the party killed it. The reptile measured better than 10 feet in length.

Cumming-museum, London, contains an elaborate display of witches' remedies collected from Londoners in the last few years.

Airport Now Obsolete**Thousands Of Dollars Being Spent On Alterations At Croydon**

Improvements and extensions costing thousands of dollars are being made to Croydon Aerodrome to cope with the growth in air traffic.

When Croydon was equipped as a main airport at a cost of \$1,600,000 in 1928, it was considered adequate for all London's air services for many years to come.

Since then passenger and goods traffic has increased by over 300 per cent, and air lines radiate to all parts of Europe, the Empire and South America.

In seven years the airport has become too small for its job, although nearly all the home airlines have been transferred to Heston and Essex airports.

The lay-out of the buildings is to be altered and extended to speed up the examination of baggage and passports. Passengers who have flown from Paris in one and a half hours are sometimes held up for 20 minutes for this inspection.

When the alterations are completed in two months passports will be inspected while baggage is unloaded from the airliner.

Methods of simplifying the loading and unloading of baggage to and from motor coaches will be used.

An Interesting Exhibit**Development Of Transportation Shown In Many Working Models**

From a chariot of ancient Rome, the development, up to the present day, of transportation on land, sea and in the air, was depicted in a transportation exposition at Saint John, N.B.

Hundreds of working models showed the growth of all means of transportation from the crude vehicle of long-ago to the vastly improved and now highly mechanized of today.

A feature of the indoor exhibit was a miniature display of Saint John river and part of the harbor with tiny ships anchored within, and a group of 74 pictures of sailing vessels famous in the early days of Saint John.

At Union station the latest steam-locomotives were on exhibition in their "Sunday best," while at Saint John airport a fleet of Canada's speediest and most up-to-date acrobatics was shown.

South Pole Tourist Trade**May Be Winter Sports Playground For Australians In Future**

The South Pole, or rather the great ice barrier 700 miles this side of it, is envisioned as the winter sports playground of Australians of the future.

The pole is about 3,100 miles from Melbourne and the barrier, 2,400 miles. The imaginative with an eye on the development of safe long-distance air travel, see the tourist of the coming day indulging in snow sports under the shadow of the active volcanoes of Erebus and Terror hunting seal, catching penguins, going kayaking among the bergs and making short morning sled trips into the blue."

Sir Douglas Mawson, Australian polar explorer, especially has been sketching prospects for development of the Antarctic, including possibilities of initiating a seal fur trade, canning of penguin eggs and the opening of a winter sports ground.

Glider Picked Up Wireless

Wireless messages were received in a glider over Dunstable in mail week for the first time in England. Mr. G. E. Collins, who holds the English distance gliding record, made the experiment, and he said afterwards that it was highly satisfactory.

"Solomon," said Mr. Isaacs to his son, "I have decided to insure your life."

Solomon looked up piteously, "Fader," he said, "vy must I burn?"

BACKACHE

If you have backache, dizzy spells, headaches, do not neglect your kidneys. Take Gin Pills for prompt relief at the first sign of these symptoms. You will feel better, look better—be better, if your kidneys are functioning properly.

GIN PILLS
FOR THE KIDNEYS

Wants Damages**Moore Smashes Automobile And Owner Wants Ontario Government To Pay**

Last fall a bull moose ran into his automobile and went off with the radiator shell and a headlight rim, and now Amey Gravelle of Napanee, Ont., wants the Ontario government to pay for it. He has made formal claim to the department of game and fisheries.

Gravelle said he and a companion were driving a car filled with blankets into a new lumber camp in the Glandale Crown game reserve, north of Sault Ste. Marie, Ont.

A turn in the road brought them face to face with the bull moose. As the car went forward the moose charged. The first smash sent the license plate into the bush. The second and swipe took off the radiator shell and half a fender. Gravelle and his companion were frantic as they tried to hold their seats in the car.

Work Is Recognized**Two Westerners Honored At Meeting Of Canadian Seed Growers' Association**

As recognition of their outstanding work as seed producers, R. D. Kirkham, Saltcoats, Sask., and W. D. Lang, Cawston, B.C., were made honorary life members of the Canadian Seed Growers' Association, in convention at Edmonton. Further honor was conferred when the two growers were made "Robertson associates" of the organization, a distinction commemorative of Jas. W. Robertson, former Dominion agricultural commissioner.

Mr. Lang has been active in the association for 19 years and Mr. Kirkham for 20 years, during which time the latter has done important work in the purification of Marquis wheat. Bronze medals will be presented later.

May Take Pets On Train**New Ruling For Passengers Using Sleeping Car Drawing Rooms Or Compartments**

Animal lovers may take their pets with them, and not leave them at home or crate them when travelling on trains, it was learned.

The Canadian National Railways, the Canadian Pacific and the Pullman Company announced patrons of sleeping car drawing rooms or compartments might take with them, dogs, cats or small animals, or birds, as long as they were not vicious or objectionable. But they must be in suitable containers.

The privilege does not apply to passengers occupying space in the body of the car, and the pets will not be allowed outside of their masters' rooms.

Had To Think Quickly

A barrister who was sometimes forgetful, having been engaged to plead the cause of an offender, began by saying: "I know the prisoner at the bar, and he bears the character of being a most consummate and impudent scoundrel."

Here somebody whispered to him that the prisoner was his client, whereupon he continued: "But what great and good man ever lived who was not culminated by many of his contemporaries?"

The song sparrow has about 2,500 feathers.

WORRIED ABOUT YOUR HEALTH?**Let SASKASAL regain and maintain it**

Nature gives Canada magnificent abundance the natural Mineral Salts found in Little Manitou. These health-giving Salts are received and maintained in the body in the form of SASKASAL SALTS.

Thus SASKASAL in turn gives to Canadians in simple form—easy and pleasant to take—the cleaning, purifying and healing properties of itself. That is the simple secret of SASKASAL Salts, so valuable to you in regaining your lost health and maintaining it in joyous vigour. If you are suffering from Arthritis, Gout, Rheumatism, Kidney or Liver troubles—take SASKASAL Salts. At all Drug Stores—69c.

MISS ALADDIN

—By—
Christine Whiting Farmenter
Author Of
"One Wild River To Cross"
"The Unknown Port", Etc.

SYNOPSIS

Nancy Nelson is a sub-deb, a gay, irresponsible girl of nineteen, with no care beyond the choice of her costume for her coming-out party. Suddenly, in the market crash, her indulgent father loses all he had, and his family is faced with the necessities of life. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted, and Nancy and Jack arrive at Pine Ridge. They are met at the railway station by Columbine Nelson, who in turn introduces Mark and Matthew Adam, two brothers of Aunt Columbine, and the party set out for Pine Ridge, which village causes dismay to both Nancy and Jack because of its dilapidated appearance and general look of poverty.

No Go On With The Story

CHAPTER VI.—Continued

As the car moved forward even Jack was dumb. They passed a filling station—a grocery—the post office and drug store—a ramshackle place marked "Restaurant" at which Nancy shuddered—a two-story hotel, its narrow porch hugging the dusty road as if land were too scarce in this vicinity to afford a lawn.

"But there's Cousin Columbine's estate," thought Nancy, grasping at this straw. "I can't be near these awful places. Perhaps there's a street or—"

No. Mark was steering the car between two sagging gate posts. Nancy stared ahead. Was this the boasted family mansion—this hideous frame house with peeling mustard-colored paint and a pretentious tower at one corner? A wave of rebellion swept through the girl; and something curious seemed to be happening to her ears. She raised her head to press against them, but heard Cousin Columbine say quickly:

"Ears popping?" That's only altitude, my dear. We're nearly nine thousand feet above the sea, and on almost the very spot where I was born. Father built this house after he struck silver at Leadville in '78. As you see, it's in need of a coat of paint; but it needed something else a great deal more so the paint must wait a year or two. Stop at the side door, Mark, or Matthew's likely to bump into us. Aurora! Aurora Tubbs, where are you? Come out at once and meet my relatives. Well, Nancy, (she turned, her lined face beaming with happy pride), "what do you think of it? Does the Nelson mansion come up to your expectations?"

CHAPTER VII.

... And all that saved me," wrote Nancy in her first letter home,

QUIVERING NERVES

When you are just on edge . . . when you don't feel like children . . . when everything you do is a burden . . . when you are irritable and blue . . . try Lydia E. Pinkham's Vegetable Compound, 98 oz of 100 women report benefit.

It will give you just the extra energy you need. Life will seem world living again.

I can't endure another day without the help this medicine can give. Get a bottle from your druggist today.

Lydia E. Pinkham's
VEGETABLE COMPOUND

"It's not the cutting I mind, Miss Columbine," Aurora corrected, appearing through one door as the boys came in another, "but seeing it disappear, so—so rapidly. You move the family Bible, Matthew Adam, and I'll set it right here on the centre table. It's a handsome cake, I think you'll all agree. Shall I do the cutting, Miss Columbine? I declare, it seems almost a pity."

"What do you think that cake is for, Aurora?" snapped Miss Columbine. "A parlor ornament?" (Nancy smiled though the phrase sounded unpleasantly familiar). "I'll cut the thing myself, on these young folks will go hungry. Give me that knife, and shut your eyes if you can't bear to look upon such desecration."

"You don't need to cut 'em quite so thick," remonstrated the anxious woman, hovering near. "That's a four-layer cake, Miss Columbine, and a wedge two inches at the widest, part's enough for any one. Those Adam boys" (she spoke as if the young men were not present) "have got fierce appetites when they go places, which is no wonder because their mother's not what you'd call a natural cook and owns to it herself, so there's no occasion for hard feelings. If Nancy eats that big wedge now, Miss Columbine, she won't have any appetite for supper."

"Oh, leave us be!" returned the older woman with impatience. "Leave us be! Here's your piece, Matthew, and don't drop frosting on the carpet. Stand close to the stove, all of you, and let the crumbs fall into the coal hole. And be sure to tell Aurora Tubbs how good it is. That's why she's hanging 'round the door."

"It's great!" grinned Jack, at which Aurora beamed.

"It's simply marvellous!" said Nancy.

The smile widened; while Mark Adam, an appreciative hand upon his stomach, murmured: "Well, Nancy. I warn you now, Miss Columbine, when I get married I aim to steal your cook."

"Wouldn't it be better to marry the cook herself and keep her in the family?" asked Matthew solemnly.

This suggestion, coming from a hitherto silent and obviously bashful young man, was not short of amazing. Nancy glanced at Matthew with new interest; but Aurora bristled.

"And me, married to Victor Tubbs for twenty years? You should be ashamed, Matthew Adam. I don't believe in divorce; and I wouldn't marry your brother if I was a widow woman and he the only male creature in Pine Ridge. He's got a fiendish nature, Mark Adam has, and I've always said, give me a faithful man or none at all. Help yourself to another else, Matthew, if you're so hungry you have to lick the frosting off your fingers. And then you'd better be starting along home. These young folks will want to begin unpacking; and if you've got some good, thick cotton stockings, Nancy, advise you getting into them double quick. Did you travel all the way from Massachusetts in that dress? It looks real fresh. If you'll give me your trunk key I'd admire to unpack for you."

"No doubt you would," spoke up Cousin Columbine, "but it's high time you were thinking about our supper, Aurora. Better take more care to munch on the way home, boys; and here's a couple of dollars that I owe you."

"What for?" asked Mark, puzzled eyes on the proffered money.

"For carting those trunks, and you, my donkey," she replied.

"Great thundering prairie dogs!" exploded Mark. "Do you take us for a pair of gyps, Miss Columbine? Come on, Matt, we better get going. The lady wants to pay us for a little matter of lifting trucks!"

"The cake was pay enough, Miss Columbine." Matthew assured her with a shy smile. "We wouldn't think of taking any money. We—we must run along now or we won't get home in time to milk. Good-night—good-night, everybody," he added, and hurrying to escape, collided with Aurora at the door.

This caused still further confusion, the young man apologizing, his face scarlet; and Aurora demanding to know why he didn't look where he was going.

"Land knows I'm not so small he had to miss me in the landscape," she complained as Matthew vanished, his ears pink with embarrassment, a wedge of the precious cake in hand. "If that's a third slice of cake you're cutting for yourself, Mark Adam, he'll better go easy on your supper or I won't be accountable for how you'll come midnight. That's a rich cake; richer's common because of company. If you don't hurry Matthew will get home first with all the news."

MINARD'S
"KING OF PAIN"
LINIMENT

Restrictions Were Lifted
British Soldier Allowed Out Of Detention Barracks For His Wedding

Army history was made at Aldershot, England, when a young gunner in the Royal Artillery was let out of detention barracks to marry a Welsh miner's daughter. Two hours later he returned from the church to the barracks to complete his sentence for a military offence.

Never before had the army authorities released a soldier to enable him to be married. The authorities had been appealed to by a friend of the bride not to spoil the wedding plans, and it was only after much deliberation they agreed to allow the prisoner out for exactly two hours.

After the ceremony the smiling couple were allowed to spend 60 minutes together in the vestry, where a brief reception was held. Then the husband returned to detention and the bride to her place of occupation.

Newspaper Advertising

Has Great Advantage Over Other Forms States Premier Patullo

"Newspaper advertising has tremendous advantages over other forms of advertising," Premier T. D. Patullo stated in connection with the Dominion-wide advertisements with which British Columbia presented its case for a changed relationship between province and Dominion.

"A newspaper advertisement," said the premier, "possesses stability and permanence. It can be studied at leisure, analyzed, and followed up intelligently by discussion. The printed word can not very well be contested, and possibility of misconception is minimized."

"For public messages of importance that require careful study and cool analysis, nothing can supersede the press."

THE RHYMING OPTIMIST

By Aline Michaelis

YOUR IMMORTALITY

I do not hold your immortality
Is but a memory dwelling in my
thought,
Although by night and day your face
I see;

And know anew the joy your beauty
brought.

Nor could I be content, believing this,
That in so small a sphere your soul
must dwell,
For you should go, released to taste
all bliss.

Through unknown regions, starred
with asphodel.

If you live only in my heart and
mind,

In my poor life, so warped by pain
and worse,

When I go, too, your magic then
would find.

No other harbor in the universe!

Your heart's or immortality
Must be past time and space, to
wander free!

—(To Be Continued)

Diamond Well Guarded

Jonker In Bullet Proof Case At American Museum

The \$1,000,000 Jonker diamond is on display at the American Museum of History, but none of the 4,000 persons who saw it the first day attempted to steal it.

The diamond is in a bullet-proof glass case.

Should anyone touch the case, it would instantly vanish into a vault.

Guards who stand nearby practiced shotshooting before going on the job.

Plan Did Not Work

A customs officer at Alexandria stopped two men carrying a sack of kitchen rubbish from a ship. Eighteen chickens' heads were in the bag. The officer opened the bird's beak and out poured a quantity of opium—from each. The two men were arrested.

DOUBLED UP WITH RHEUMATISM

Could Not Wash Himself Nor Brush His Hair

So bad was his rheumatism that his friends declared he would never work again. Although he is 70 years old, he proved they were wrong. Read what he says:

"I am seventy years of age. Last Christmas I was completely disabled with rheumatism. I could not brush my hair nor wash myself. People said I should never work any more. I was working harder than a young man to-day. Thanks, many thanks, to Kruschen Salts. I put them in my tea, and I have recommended them to many. I could not get in or out of bed myself, nor sit up. But see me work now—12 hours sometimes. Kruschen Salts have done it."

Rheumatic conditions are the result of an excess of uric acid in the body. Two of the ingredients of Kruschen Salts have the power of dissolving uric acid crystals. Other ingredients are: Nettle Root to expel these dissolved crystals through the natural channel. In addition, there are still other salts in Kruschen which prevent further fermentation in the intestinal tract thereby checking the further accumulation not only of uric acid, but of other body poisons which undermine the health.

Little Helps For This Week

The ornament of a meek and quiet spirit which is in the sight of God of great price, 1 Peter 3:4.

Thy sinless mind in us reveal
The spirit's plenitude impart;
Till all my spotless life shall tell
The abundance of a loving heart.

—Chas. Wesley

Holiness appears to be to make the soul like a garden of God with all manner of pleasant flowers, that is all pleasant, delightful and undisturbed; enjoying a sweet calm and the gentle life-giving beams of the sun. The soul of a true Christian appears to be a little white flower like we see in the spring of the year, low and humble on the ground, rejecting as it were in a calm rapture, duffing around a sweet fragrance, standing peacefully and lovingly in the midst of other flowers round about, all in like manner drinking in the beams of the sun.—Jonathan Edwards.

New Soil Laboratory

Wind Tunnel Is To Be Constructed At Swift Current

Construction of a wind tunnel for conducting soil drift experiments at the Dominion farm in Swift Current, Sask., will be undertaken this year.

Such equipment will be part of a new soil laboratory to be erected at the farm at a total cost of some \$25,000 including equipment. It will be used to study the effect of wind currents on certain types of soil under different methods of cultivation in a similar manner of that employed by the research council for testing new wing constructions.

Forbid Hypnotism Shows

Roumania Claims They Are Dangerous To Public Health

The Roumanian department of public health has issued a strict order prohibiting all hypnotism and telepathy performances, as well as all moving pictures and plays dealing with these subjects. It is explained in the order that such performances present a great danger to public health and that numerous cases have recently been reported where people suffered serious nervous shocks by witnessing hypnotism and telepathy demonstrations.

BOARD CHECKS GRAIN DEALS

Commissioners Say Farmer Should Not Pay Interest On Own Money

Western Canadian farmers are no longer going to be called upon to pay what actually amounts to interest on their own money, so far as the Board of Grain Commissioners for Canada is concerned.

Several instances having been called to attention of the board whereby track buyers and grain dealers have been charging interest on initial payments made to farmers against purchase price of grain notices warning all and sun-dry that such practice is illegal are being posted.

Alberta, as other provinces, has its ample share of complaints and so far all have been satisfactorily adjusted and refunds made with the interest charges doing the refunding.

Apart from being extra charges against vendors who haven't had any too much wheat in recent years or received very high prices, the addition of interest on preliminary payment is contrary to the Canada Grain Act in regard to contracts or track buyers (purchasers of grain loaded on cars) and grain dealers [those purchasing from the farm].

For example, if a grain dealer or a track buyer pays a farmer 50 per cent of the value of his grain and then in the final settlement charges interest or exchange on that sum he is contravening regulations, whether the payment is labeled an "advance" or otherwise.

The board, in referring to the once popular practice, indicates that licensed track buyers and grain dealers are purchasers and not agents and the contract made between them and vendors of the grain is in relation of purchase and sale, not principal and agent.

Further explaining the situation, what the buyers might class on their final billing as an advance is not actually an advance or loan to the seller of the grain but is part payment of the purchase money. Naturally the vendor should not be asked to pay interest on what is actually his own, it is pointed out.

Where purchase is made at country points the board advises buyers to have funds available at that point to pay for the grain as there is no reason why the farmer should have to pay exchange.

Under the Grain Act, buyers referred to are entitled to deduct from the final settlement only freight charges weighing and inspection fees.

Stevens Pledges Support to Govt, Fulfilling Report

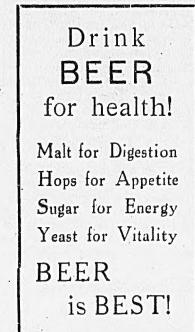

VERDUN, Que., June 1. [C.P.]—A promise of unequalled support to any government which carried out recommendations of the price spreads commission report was given last night by Hon. H. H. Stevens, former minister of trade and commerce, who spoke in this city's neighboring Montreal.

Their could be no economic or social soundness of the basis of politics until the people themselves were in a comfortable and economically sound condition, Mr. Stevens said. Instead of sending young men to camps he strongly advocated a housing and reforestation program, coupled with a scheme of grade separation. Necessary funds to the amount of \$100,000,000 he would have obtained by reducing the gold backing of the currency to 25 per cent.

It was time hope was translated into reality in matters economic and social, Mr. Stevens said. Far more could be done than had been attempted in trying to bring about a return to prosperity.

AUTO TOLL in U.S. IN HALF YEAR 15,200

HARTFORD, Conn., July 1. [A.P.]—A toll of 15,200 dead and 300,000 hurt in automobile crashes in the United States during the first six months of 1935 was reported today by the Travelers' Insurance Company. The number of deaths is about two per cent less than for the first six months, last year, the report shows.

CONTROL MOVEMENT OF UNGRADED EGGS

OTTAWA, June 27. [C. P.]—The movement of ungraded eggs from points in Saskatchewan to Winnipeg will be greatly curtailed as a result of an order-in-council requiring that shipments of eggs from provinces in lots of 50 cases or more, in future, be properly graded before shipment, according to a statement from the agriculture department Tuesday. This ruling becomes a part of Dominion egg grading regulations and is now effective.

The order is in line with the policy of the Dominion department of agriculture to have grading of eggs done as close as possible to point of production.

William Aberhart's new booklet on his social credit theories is expected to be offered soon for province-wide distribution, according to recent radio announcements.

While the definite date when the latest publication, said by advertising solicitors to contain between 80 and 90 pages, will be placed on stands is not definitely indicated, presses are at present busy rolling out the introductory batch which rumor says will number around 100,000.

FAIR LABOR POLICIES BENEFIT THE CONSUMER

WORRY and unhappiness are enemies of efficiency. We have always tried to be efficient and year after year said, "To the greatest extent possible let us get worry and unhappiness out of this organization—out of the minds of every man and woman in our employ."

Imperial Oil has always paid high wages. It set up sickness and death benefits, a pension plan and group insurance for its workers. It made it easy for them to share ownership in the Company. It gave them a voice in the discussion of Company

policies that directly affect them. It introduced the forty-hour week, thus increasing the number of those who work for the Company.

Efficiency and loyalty are repaying the Company for all these measures. Imperial Oil employees give generously of their hands and minds because they are well treated. They feel secure and this feeling is reflected in their work and in the high quality and lower cost of the products they make. The consumer benefits, the employees benefit and the Company benefits by these policies.

IMPERIAL OIL LIMITED
